

“None of us is as smart as all of us.”
Ken Blanchard

TEAM BUILDING WITH A DIFFERENCE

Skills Channel TV has an excellent reputation for really high energy and high impact team development events. We help people in teams to:

- Understand themselves and their drivers
- What motivates and inspires them
- How people work and think together
- Recognise the value in team working
- Develop best practice ways of working together
- Plan for changes to team dynamics
- Value and learn from success

HOW WE DEVELOP YOUR EVENT

The starting point is ‘**What do you want to achieve?**’ From there we work with you on outcomes, objectives and then what we can offer within your budget and your time. Events can be indoor and desk base, outside of your company or in a venue of your choice. We look at what needs to be done before a team building event and what should happen to re-enforce the learning after the event.

If you wish to build in your own competencies or MBTI or SDI or anything similar, we too can build activities around those topics.

SOME EXAMPLES OF WHAT’S AVAILABLE

Play in a Day

Why not take over a theatre for the day and design and produce a play at the end of the day. All team dynamics and co-operation are fully challenged.

Rock Band Idol

Make your own CD in a recording studio – absolutely no musical experience required. Huge fun with a very serious team learning output.

TV Studio Experience

Plan, produce and film your own five or ten minute video. A corporate induction video perhaps or a key company message. Scary pressure.

Horses for Courses

Not horse whispering but learning leadership and communication with a range of horses. The skill is to gain their trust and then get them to follow your leadership on their terms. A fantastic day with huge learning for leaders.

Chocolate Shop

Make your own chocolates and then run a chocolate shop with quarterly results. Very business focused but not the best of events for diabetics.

The next step – call us! We’ve loads of ideas.
